*imagine*radiology™

The first fully integrated Practice Management Software
designed specifically for RADIOLOGY!

Inspiration Technology, Inc. delivers implements and supports medical technology products and services designed to help practices improve efficiency and build value. By designing systems, providing integrated workflow solutions, and supporting business functions, Inspiration Technology has the expertise and methodologies that help practices achieve peak results with less effort.

The use of industry-standard tools to provide you with a foundation to address your unique business needs allows us to leverage millions of dollars of development that industry leaders like Microsoft have invested in their products. By building upon this foundation, Inspiration Technology, Inc. provides you with a proven information system platform that will help your practice maintain the competitive edge and maximize efficiencies.

VALUE PROPOSITION;

We facilitate increased profitability of a Radiology Practice by applying the same standard of innovative technology to the financial health of your business as you do to the clinical side.
